

Testimonials

I was a student at Waterford Institute of Technology while Dr Venie Martin was Head of International Development. With regard to my experience with WIT and specially the support provided by Dr Martin, I am very pleased to provide this testimonial.

Stating from arrival and induction program up to the completion of my MBA I enjoyed every part of my student life. While working at WIT Dr Martin took a great care of all international students. She usually gives advice to students and regularly monitored our wellbeing. Venie organised many cultural parties which really made us feel as if we are at home away from home. She not only organised these parties but also participated in them. She also organised many trips and outings for international students.

She actively promoted the international students cause. She has an extensive knowledge in international culture and has visited many countries to learn the society and its culture. She acted as an advocate for international students, whatever difficulties they encountered. Personally she helped us to open the WITSAS, a society promoting the interest of South Asian cultural, and to build a social ties at Waterford Institute of Technology with these countries. As the head of International office she showed a very good leadership skill and I know she will bring this to bear on her new venture, Waterford Academy of Education. I feel very comfortable recommending this Academy to any international student.
